The antimicrobial product additive inhibits the growth of fungi, molds, and bacteria that can cause early product deterioration. The antimicrobial treatment permeates the rubber band, protecting it on all surfaces for its lifetime. This product does not protect users from food borne or disease causing microorganisms and is not safe for direct food contact.
Our Non-Latex® Rubber Bands with Antimicrobial Product Protection include an antimicrobial agent to make them resistant to microbes such as bacteria, mold, and fungi.*

- Bright cyan color for easy identification
- Non-Latex® for people with latex sensitivities
- Made in a facility where latex products are produced

Studies have shown that frequently touched objects which cannot readily be sanitized, such as keyboards, pens, and rubber bands are often heavily populated with bacteria. Our Non-Latex® Rubber Bands with Antimicrobial Product Protection include an antimicrobial agent to make them resistant to microbes such as bacteria, mold, and fungi.

**VALUE**

Ideal for industrial & laboratory applications, home, school, workplace, medical facilities, and medical supply wholesalers, medical parts, packaging, and manufacturing.

**TIPS**

With the arrival of superbugs, offices of all kinds are looking for options to keep germ-free, especially during flu season. Now is a great time to start investing in antimicrobial products. Reducing the spread of harmful germs means less employees needing time off work, which results in more overall productivity for any organization.
