

EPDM BANDS

Our EPDM Industrial Bands deliver unmatched resiliency for diverse applications, from heavy-duty industrial tasks to extreme outdoor conditions. Crafted from Ethylene Propylene Diene Monomer (EPDM), these non-latex rubber bands feature a tight stretch and heavy wall design for secure, durable bundling.

Heavy Duty EPDM BANDS

Our EPDM Industrial Bands are crafted from Ethylene Propylene Diene Monomer (EPDM), a premium synthetic elastomer renowned for its exceptional durability and resistance to UV, ozone, and temperature changes. Designed for heavy-duty industrial applications, these bands offer a tight stretch and robust wall design for secure bundling, making them ideal for all-weather outdoor use. EPDM Industrial Bands provide a traditional rubber band design optimized for industrial strength and durability. Select EPDM compounds can be manufactured for **antistatic** and **ESD-sensitive** applications designed to help reduce electrostatic discharge (ESD) buildup. These bands are ideal for bundling static-sensitive components including integrated circuit (IC) tubes, trays, boxes, and carriers used throughout the semiconductor and electronics industries. Additionally, durable EPDM construction provides a reusable alternative to single-use plastic ties for both indoor and outdoor applications.¹

- 100% Non-Latex for safe handling
- Extruded up to a ten-inch flat length for versatile bundling
- Excellent resistance to UV, ozone, moisture, steam, and temperature extremes
- Reusable alternative to single-use plastic ties
- Select EPDM compounds available for Antistatic and ESD-sensitive applications
- Designed for industrial, electronics, and semiconductor applications
- Suitable for indoor and outdoor environments, with cleanroom-compatible compounds available
- Made in the USA using globally sourced materials

¹**Proposition 65 Warning:** Certain EPDM compounds contain chemicals which are known to the State of California to cause cancer, birth defects, or other reproductive harm. For more information go to www.P65Warnings.ca.gov.

VALUE

EPDM Bands are more durable and long lasting than regular rubber bands, making them the solution for industrial and outdoor use.

WHERE TO SELL

Manufacturing
Plumbing
Automotive
Industrial Pipefitters
Military & Government
Construction
Parks & Recreation
Mining & Excavation

TIPS

EPDM Bands and Tubing are designed specifically for heavy-duty usage. These products are versatile and useful in a wide range of applications such as securing core boxes for mining and excavation or bundling survival gear during military training exercises.
