

PARACHUTE BANDS

PARACHUTE BANDS

Parachute bands are used by the military and recreational skydiving community for Free Fall, Static Line, HALO, Sling Load Operations, and all military airborne operations. These bands hold the bundled lines of the parachute canopy inside the container in carefully organized stowed lines. As the main parachute deploys, the stowed lines will separate from the rubber bands and straighten out in an orderly manner. This ensures that all lines are in place before the parachute fully inflates and limits the amount of shock on the body.

They also provide a fast and effective way of securing gear to plate carriers, weapon stocks, backpacks, etc., and are much more durable than regular rubber bands.

Manufactured from natural crepe rubber (a latex product) our parachute bands are also used by military parachute riggers to hold cord in place when rigging parachutes. They're ideal for any application requiring a rubber band with good stretch. You can use these to pack your parachute, or simply to manage the paracord you keep in your pack or survival kit. They also loop well on PALS grids for securing necessities like tourniquets.

- Made in the USA using globally sourced materials at our ISO 9001:2015 Certified Facility
- Used by the military as well as the skydiving community
- Produced IAW applicable MIL-SPEC DWG
- Cage Code: 46619
- Women-Owned Small Business (WOSB)

200 lb. Minimum Order

All bands produced in accordance with governing specifications.

1 lb. Box | 25 per Case

ITEM #	NSN #	DESCRIPTION
2481509	1670-00-568-0323	Type I • 2" x 1/2" x .035"
2171409	0670-01-323-9900	Type II • 2" x 3/8" x .062"
2569502	0670-01-539-1339	1-1/4" x 3/8" x .065"
2409402	1670-01-459-5471	1" x 1/16" x .062"

25 lb. Bulk Case

ITEM #	NSN #	DESCRIPTION
2555224	1670-01-557-7623	2" x 5/8" x .062"

VALUE

We offer a variety of sizes to fit the many different needs of parachute riggers and skydiving enthusiasts. Alliance Rubber Co. is the sole provider of Parachute Bands for the U.S. Military.

TIPS

There are several different parachute rubber bands, and each serves a very distinct purpose. For most sport skydiving rigs, large rubber bands are used for the locking stows and small rubber bands for the remaining stows. Tandem rubber bands are used for tandem main canopies.
