

# ALLIANCE RUBBER SILICONE LOBSTER BANDS

## LOBSTER BANDS ARE TAKING A GIANT STEP FORWARD.

Alliance silicone rubber bands and tubing are made from high quality, food-grade silicone that complies with FDA regulations (FDA 21 CFR part 177.26) and are suitable for food contact, passing both the formula compliance as well as the compound extraction tests. The extraction was performed in typical conditions as well as boiling point. These bands can withstand water temperatures as cold as -47°F (-44°C) and as hot as 450°F (232°C) which allow you to leave the bands on while cooking.

The bands, made from a special silicone formula, maintain their stretch and strength in both hot and cold temperatures and require 14% less force to stretch the band with standard pliers.

They are non-toxic, non-latex and do not affect the cooking or flavor of the lobsters.

Location of origin, or traceability, is becoming increasingly important. We have the ability to print that information directly on the band, using ink that forms a bond with silicone, ensuring the ink will never fade.

Our silicone bands will not degenerate when exposed to ultraviolet light and atmospheric ozone.

**The bands you don't use this season, you can use next season.**

Sizes: 1  $\frac{3}{16}$ " x  $\frac{1}{2}$ " and 1  $\frac{3}{16}$ " x  $\frac{3}{4}$ "

Standard band colors: White, Red, Blue, Yellow, Green

Minimum order quantity: 60 lbs. per size and color.

Custom sizes, imprint and Pantone band color match available. Minimum order quantity for custom product: 200 lbs. per size and color.
